

CRISTÓBAL TAVERA

## About me

Self-taught web developer with extensive experience in React and Next.js, among other technologies, and with knowledge of TDD fundamentals. Organized, proactive and well-informed about coding and accessibility best practices.

With ambition and confidence to tackle the development of any project, willing to learn new technologies in the process.

## TECHNICAL PROJECTS

### Online shop

<https://online-shop-five-alpha.vercel.app/>

- Implemented **React** functionalities such as State and Context, and **Next.js** functionalities such as Dynamic Routing and SSR.
- Employed the **Sanity** library to ease the component-based code structuring, and the **Stripe** library to build the payments page.

### CRUD Application

<https://think-share.vercel.app/>

- Built and managed a non-relational database (**MongoDB**) through **REST API**'s, allowing to create, read, update and delete data.
- Designed using a CSS framework (**TailwindCSS**).

### Wordle Game

<https://wordle-zeta-five.vercel.app/>

- Developed with **TypeScript** to avoid errors with a stricter code.
- Used **ESLint** to detect errors and bad practices and increase control on my own code.

## FORMAL EDUCATION
